Subject: RE: ACHP Letter on Honolulu

Jim, should we setup a call to discuss this with Honolulu, as well as any comments on the draft mou's they sent, or can I just craft an email you can review? I'm not wild about more calls but it might be good to discuss this since they always need such clear direction to get it right.

Let me know what you think.

Ted

Subject: ACHP Letter on Honolulu

Ted:

I saw the letter from ACHP. The ACHP expects a very step-by-step process. Before you begin circulation of the draft MOA (and there should be only 1, not 2 agreements), make sure that the following steps are done:

1. DTS has sent to all Section 106 consulting parties (including the Native Hawaiian Organization):
(a) the identification of historic properties (i.e., the evaluation of historic significance of properties within the APE), and
(b) the FTA/DTS determination of effects on properties deemed eligible for the Register or on the Register.

The SHPO transmittal should request concurrence in both (a) and (b);

2. FTA has sent a letter to the ACHP informing ACHP that the undertaking will have adverse effects and transmitting (a) and (b), for information, but ACHP may decide that they want to participate in the consultation. After they are informed by FTA that the project has adverse effects, they have 15 days to inform us if they want to participate [36 CFR 800.6(a)(1)];

3. Only after the SHPO concurrence in (a) and (b) has been received, and the ACHP's concurrence, too, if they are participating, should the draft MOA be circulated to all consulting parties for review and revisions.

Jim, as expected, attached is the letter from ACHP. I just sent you the draft of the 2 MOU's, Honolulu asks that we look at the drafts and discuss with them whether to go with two or one MOU. These said 2 made sense to them but they're open to discussion.

Also looks like ACHP wants some sort of briefing and feedback on the process. Lets discuss how to proceed when you return to the office.

thanks,

Ted

FYI and appropriate action. We may want to coordinate response with TPE. Thanks!
